DETAILED ACTION

Response to Amendment

1. In response to the amendment filed July 28, 2003, claims 1-6 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Cook et al (US 6,427,063) for the reasons set forth in the previous office action (see paper no. 6) and incorporated herein.
4. Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Wall et al (US 6,371,765). Wall et al discloses a training method for automatically determining and meeting the training needs of training participants comprising entering the learning objectives, background knowledge and requested topic of the learning needs of a training participant (Col 4, lines 22-57), determining all training all modules responsive to a user's entry (Col 5, lines 15-25), identifying selected training modules dependent upon a user's background knowledge and defining a training unit customized to a user from the multiple training modules previously identified (Col 5, lines 41-67).

Art Unit: 3714

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cook et al in view of Tatsuoka (US 6,301,571 B1) for the reasons set forth in the previous office action (see paper no. 6) and incorporated herein.

Response to Arguments

Applicant's arguments filed July 28, 2003 have been fully considered but they are not persuasive. Applicant's representative argues that the Cook et al reference does not show that a customized training program is composed of a number of previously stored training modules. However, in Cook et al, Column 5, lines 54-65, Cook et al presents the fact that new training modules may be composed from previously stored data, including whole, pre-formatted animated sequences that may be compiled to form a new, customized training module.

Art Unit: 3714

Applicant's argument regarding claim 6 is moot in view of the new grounds for rejection of the claim necessitated by the amendment to the claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Trudeau (US 5,980,447) for a discussion of an interactive module generation system customized to learner's using the system.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L Sotomayor whose telephone number is 703-305-4558. The examiner can normally be reached on 6:30-4:00 M-F.
